

Figure 1 (prior art)

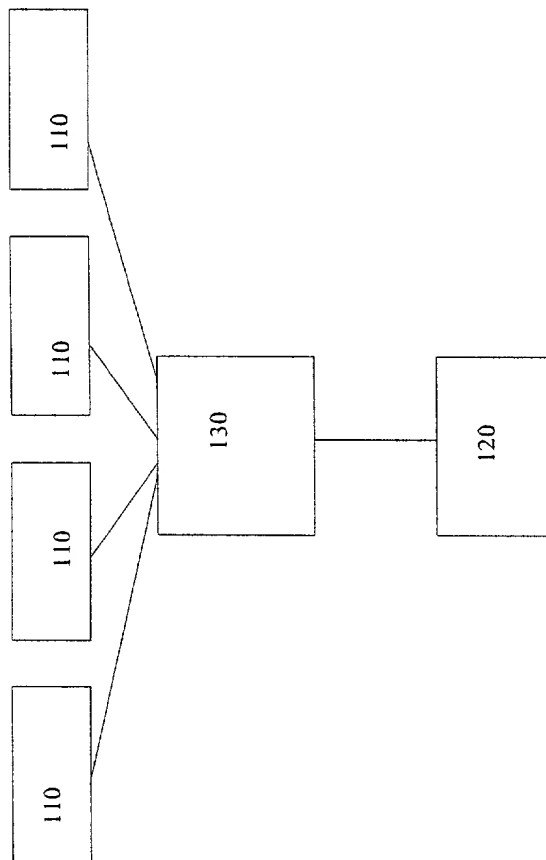

Fig. 2

```
/**
 * This object that does something important()
 * It does the important something by doing things of lesser importance
 * other things also do things
 */
double dVariable;
dVariable= 1      // declare a variable and set it to 1
int nVariable = 1 // comment
,
```

210

200

The diagram consists of two lines originating from the number '200' on the right. One line extends leftward to the comment '// declare a variable and set it to 1' on the line 'dVariable= 1'. The other line extends leftward to the comment '// comment' on the line 'int nVariable = 1'. Additionally, a line connects the number '210' at the bottom to the comma ',' at the end of the 'int nVariable = 1' line.
